

BS Partner at HMI – the worldwide leading industry exhibition in Hannover, Germany

Augmented Reality: Metaio and tarakos two strong partners

A number of partners of Bitmanagement Software GmbH will present their products in April 2006 at the Hanover fair (HMI), the worlds largest industrial exhibition. Two strong partners who integrated under the **BS Technology Invest Program** the visualization software of Bitmanagement in their concepts and products and now marketing their products in industrial goods markets.

Metaio GmbH conceived, develops and markets innovative solutions and products of the range of **Augmented Reality (AR)**. With this technology virtual, three-dimensional models can be positioned exactly and in real time into an existing environment. The company ranks among the frontrunners in the field of augmented reality and offers professional soft- and hardware solutions for enterprises in industries – such as automotive and mechanical engineering - as well as the trade business.

At the HMI, hall 17, booth B10, Metaio presents the planning software RoiVis. This serves the simple and effective layout planning of products and operational resources supported by Augmented Reality technology in the real existing manufacturing environment.

Tarakos GmbH located in "experimental factory" in Magdeburg, Germany, develops and sells **Virtual Reality** applications for medium-sized industry: Among other the taraVRbuilder for the material flow optimization in factories and warehouses is part of the product family, as well as taraVRcontrol for the visualization and improvement of fab-processes, which are controlled by programmable controllers (SPS).

At HMI, hall 16, booth E16 tarakos presents the employment of the tarakos products continuously from planning and simulation animation up to the 3D-online-process-visualisation.

The BS Technology Invest Program helps innovative technology concepts to use the product portfolio from Bitmanagement. Private people and SMEs, whose business idea and/or founding came to live not longer than 12 months ago can use the technology on success basis.
