

Potsdam, 11.11.2004

Press release

www.Solepark.de - New Internet presence with complex real-time-3D-world and e-learning area.

On 9 November the new Internet presence was handed over and taken in enterprise to the SOLEPARK Schönbeck/Bad Salzelmen in the presence of the minister of economics of Saxony-Anhalt, Mr. Dr. Rehberger, the lord mayor of Schönbeck/Elbe, Mr. Hans-Jürgen Haase, as well as the project participants.

The new Web portal of the oldest sole therapeutic bath in Germany combines a whole row of different medium formats, in order to address old, new and future groups of visitors and to awake interest in the SOLEPARK.

Beside the extension of the content-offer and the redesign of the classical 2D-range there is a special highlight: a vml-based real-time-3D-clone of the spa gardens area. During his passage the visitor can take a look at the detail-faithfully copied, partially historical buildings. There, the visitor receives both the information of the 2D-range to his current position and explanations by a virtual audio-guide. The navigation in the 3D-World can be done with mouse or keyboard, by an outline map of the park or as led route over navigation buttons. By the use of "BS Contact VRML/X3D" of Bitmanagement as viewer, a highly performing representation could be reached for unusually complex 3D-scenery in online applications.

Additionally an e-learning area was integrated, which is addressed particularly to teachers and pupils. In it, subjects are arranged to different parts of instruction directly in line with standard usage to and around the topic "SOLEPARK". Beyond that, the SOLEPARK offers also project days in the spa gardens to teachers and pupils.

For children starting from 8 years the 3D-educational game "Adventure: Saline" was developed. It shifts the player back into the Solepark of the 18. century, where he has the task to produce and to sell salt. At this, the player must grapple itself with some classical problems of production, how about broken gear wheels or fires. The play can be downloaded on SOLEPARK's website for free.

In a developmental period of nine months, the online presence and a DVD, which contains additionally material and an animated film to the spa gardens, were realized by ITnB and SBSK.
