Bitmanagement – a reliable partner

Bitmanagement Software GmbH (Berg, Germany) is a leading developer of interactive, real-time 3D and multimedia software for a diverse range of markets and applications, based on the international Web 3D standards X3D, VRML and MPEG-4.

The **Company** develops and markets a product portfolio of visualization software:

- o Platform   BS Contact VRML/X3D, MPEG-4, Java, Stereo, Mobile, Geo
- o Description   BS SDK ("Software Development Kit") with encryption software
- o Tools   BS exporters for workflow optimisation

The portfolio is continuously extended and the licensing scheme is flexible.

The **Software** is used worldwide by OEM customers and integrated into tailored applications:

- o University   Pennstate, CASE Western Reserve, Uni of Kentucky, Uni of Munich
- o R&D   Fraunhofer, U.S. Navy, EADS, Institute for Defense Analysis
- o Industry   Lockheed, Intergraph, Siemens, Bertelsmann, Telecom Italia

The developed applications target diverse market segments.

The **Benefit** of the service rendered by Bitmanagement depends on the application:

- o Standards   the software is ISO standards conformant and easy to integrate
- o Performance high performance rendering and stability enables rich interactivity
- o Internet   the Internet readiness of the software powers new business concepts

BS Contact supports various in/output devices in applications developed by third parties.

The **Team** has extensive experience in third party projects and developments:

- o Know how   the technology has been in continuous development for 10 years
- o Capacity   the 15 person, international team of industry specialists
- o Trends   in real-time 3D graphics like shaders are supported

Current release 7.0 of BS Contact VRML/X3D enables new levels of visual quality.

The **Growth** of the company is on target and based on our strong foundation:

- o Founding   in 2002 by 3 employees of the former blaxxun interactive AG
- o Development   2005 turnover duplication, again profit and cash-flow positive
- o Independence from the investment capital markets enables rapid decision-making

Q1/2006 shows a further increase in revenue and incoming orders.

Bitmanagement is on the board of directors of the Web3D Consortium, which is dedicated to the development and publication of 3D ISO standards for the Internet, as well as member of the 3D Consortium, the aim of which is to develop the market for stereoscopic visualization.
